### 2010 Efficiency Vermont Clothes Washers Eligibility Requirement

**Modified Energy Factor (MEF) must be 2.2 or higher.**

MEF is a calculation of CuFt Capacity *divided by* the energy Consumed

Energy consumed is the total of: a) the machine's electrical energy consumed, plus b) the hot water energy consumption, plus c) the energy required to remove the remaining moisture in the clothes (in the dryer). A higher MEF means the machine is more efficient.

**Water Factor (WF) must be 4.5 or less**

WF is a calculation of the gallons of water used for the wash cycle *divided by* the CuFt Capacity of the machine. A lower WF means the machine is an efficient water user.

**ARRA Rebate Information:** Only models on this list will be eligible for the \$200 ARRA rebate, starting March 6th, 2010. Funding is limited and the ARRA rebate form will be available on a first come first served basis from Vermont appliance retailers. ARRA rebate form is not combinable with any other Efficiency Vermont offer. Additional requirements must be met to receive the ARRA rebate. For more information and a complete list of eligibility requirements, contact your local retailer, visit [www.encyvermont.com](http://www.encyvermont.com) or call 1-888-921-5990 .
