Vermont's Comprehensive Energy Plan

Improve the energy efficiency of 25% of the state's housing stock by 2020 (approximately 80,000 housing units)

New homes net zero by 2030

90 % renewable by 2050

New Construction

KWH/Yr Based on Oil Use

```
391 gals/ yr = 54.036 Mbtu/ yr
54.036 Mbtu/yr x .80 = 43.228 Mbtu/yr
43.228 Mbtu/yr / 2.6 (COP) = 16.63 Mbtu/yr
16,626,523/ 3412 (KWH / btu) = 4,873 KWH/yr
```

Heat Load 4,873

Plug Load <u>1,200</u>

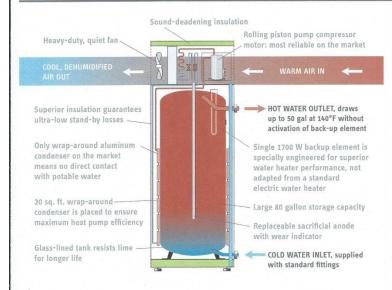

Total 6,073

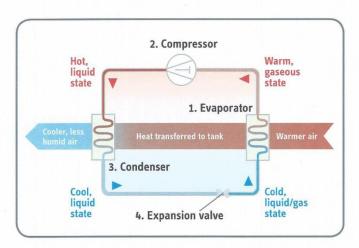

Capture the Energy

STIEBEL ELTRON

Simple innovation from Germany.

Heat pumps have been around for decades, but a heat pump water heater is a new concept. The Accelera® 300 works like an air conditioner but instead of dumping the heat outdoors, it puts it into the water.

The heat pump system contains a fan that forces air through an evaporator (1). The evaporator contains a liquid refrigerant. When this refrigerant evaporates, it extracts heat from the ambient air.

The now warm gaseous refrigerant passes through the compressor (2) which increases its pressure. As the pressure increases, the temperature of the refrigerant rises. The refrigerant turns back into a liquid which is now hot.

The hot refrigerant then passes through the condenser (3), which is wrapped around the water tank, transferring its heat to the water.

The refrigerant which is now cool then passes through an expansion valve (4), where it goes back into a gaseous state and the process begins anew.

ISO 9001

State and Local Rebates / Incentives | Regional incentives for the Accelera® 300 may be available. The US Department of Energy's Database of State Incentives for Renewables & Efficiency website, DSIRE, has up-to-date details at: http://www.dsireusa.org/

Vermont's Energy Future

80, 000 homes is ¼ of the total housing stock

90 % renewable by 2050

New homes net zero by 2030

Can we get there?

"Optimists underestimate difficult it will be to succeed. But that self-deception is precisely what makes them willing to take more risks and invest in a better future, while pessimist slouch towards self fulfilling failure.

So do your kids (Vermont) a favor in the coming year, be of good cheer. Don't condemn the next generation to penury through the tyranny of miserable expectations."

Charles Kenny
