

Energy Efficiency: The Savvy Rental Property Owner's Secret Advantage

Upgrades to lighting, heating, and water heating give your rental property operational savings and long term stability. Not only will efficiency projects save money on energy, they can increase tenant comfort, building aesthetics, and property value.

- ✓ Increase tenant retention
- ✓ Lower utility bills for you, or your tenants
- ✓ Offer tenants an energy efficient space
- ✓ Reduce maintenance costs

Start with a FREE Consultation

Meet with an Efficiency Vermont energy expert who can identify the energy improvements that save you (and your tenants) money, and can improve your properties' value.

- **A clear understanding** of what systems are wasting energy and money
- **A prioritized plan** and resources for cost-effective projects including low-to-no-cost improvements
- Current **rebates available** to minimize project costs
- Purely **objective recommendations** and a direct contact from the Efficiency Vermont team for future project needs or questions

Efficiency Vermont offers many ways for multifamily property owners to improve the efficiency of their buildings, from free measures to comprehensive projects.

\$

Free Upgrades

Simple measures like LED bulbs and water conservation devices can reduce tenant utility bills by \$10/month, increasing their ability to pay rent.

\$\$

Moderate Renovation

Your local contractor network can deliver Efficiency Vermont rebates and discounts on heating, ventilation, and appliance replacement projects.

\$\$\$

Substantial Improvements

Cash incentives from Efficiency Vermont can pay for a large portion of weatherization measures. We can also help you secure incentives for on-site EV charging.

Sign up for a FREE Energy Consultation from an Efficiency Vermont expert at EfficiencyVermont.com/RentalConsult or call 888-921-5990.

Offers for your rental property:

Cash back rebates on qualifying heat pump water heaters, freezers, in-unit dryers & clothes washers, refrigerators, smart thermostats, and window air conditioners

Comprehensive weatherization can result in reduced heating and cooling costs, and you may be eligible for 75-100% off the project costs, depending on your property

FREE LEDs, shower heads, faucet aerators, and insulating pipe wrap for your buildings
